

1 ABSTRACT OF THE DISCLOSURE

2 A barbecue grill has a stand, a body, a grid and an adjusting device. The
3 body is attached to the top of the stand. The grid is adjustably mounted on the
4 body with the adjusting device. The adjusting device has a shaft and a
5 positioning device. The shaft is moveably extended through the body and is
6 rotatably connected to the grid. The positioning device is mounted between the
7 body and the grid and is connected to the shaft to hold the shaft at a desired
8 position. Accordingly, the grid can be rotated away from the body when the user
9 want to add charcoal into the body or pick the roasted food from the grid. The
10 use of the barbecue grill is convenient and versatile.
